Copper Beeches OPH, Andover -

Location – boiler house, 2no AO Smith hot water calorifiers :-

16/03/2012 (day one):

- Isolated & drained hot water calorifier no.1 and removed inspection hatch
- Inspected internal condition of hot water calorifier no.1 and found evidence of heavy but loose scale deposits
- Deposits were soft enough to be removed by hand and wetvac hoover
- Replaced existing inspection hatch seal with new gasket
- On completion, the unit was returned to service

21/03/2012 (day two):

- Isolated & drained hot water calorifier no.2 and removed inspection hatch
- Inspected internal condition of hot water calorifier no.2 and found evidence of heavy but loose scale deposits
- Deposits were soft enough to be removed by hand and wetvac hoover
- Replaced existing inspection hatch seal with new gasket
- On completion, the unit was returned to service

22/03/2012 – call out:

Returned to site having received a call from the home regarding small deposits from the cold water taps and advised that this is probably due to the work carried out on the deadleg removal. Also advised staff to run taps to help alleviate the problem.
